AL AZHAR UNIVERSITY, CAIRO — MAJORING IN ACCOUNTING

Learning about accounting, economics, marketing

NOTES (REACT.JS-NODE.JS)

This site is about making a personal page for each user by signup, login

Upon entering, he can create his own notes with the title and content of the note, and he can modify or delete the note, and the site displays the note to the user with the date it was written. I recommend trying this site

- React.JS
- Local storage
- sign up and login
- node js
- mongooDB
- express
- If you want details about the project please read the file.
